

ORGANIC MAPLE SYRUP

ORGANIC MAPLE SYRUP

incredibly delicious, sweetly priced!

- * **OCIA Certified Organic**
- * **Certified Kosher**
- * **Available in Two Grades**
- * **Superior Quality**

ALSO AVAILABLE IN 5 GALLON TIN OR BAG-IN-BOX.

LIVE WELL. SPEND LESS. DISCOVER NATURAL VALUE.

We think that a healthy lifestyle should be affordable for everyone. We developed Natural Value because we felt that we could find and deliver premium quality natural and planet-friendly products to the marketplace in a more efficient and cost-effective manner. To that end, we've managed to streamline the distribution process and lower the cost of living well. Our goal is not to woo Wall Street with large profit margins. It is to reward your commitment to living responsibly with lower prices on natural products. We prefer a business model where everyone, including you, profits.

HOW TO MAKE MAPLE SYRUP

Maple syrup is made from the sap of Sugar Maple trees that grow in Canada and the Northeast United States (Vermont, New Hampshire, Maine). The sap forms in the trees and begins to “run” (not the mile) when the spring thaw arrives.

Once upon a time the maple sap was collected by tapping into a tree, placing a bucket on the tap, and waiting for the sap to flow into the bucket. This method required placing formaldehyde tablets inside the tree to keep the tap open and syrup flowing. Farmers (and their bored teenage children)

would then collect the syrup and transport it to the syrup house (also called sugar house) for processing.

Today, farmers use hoses and tubing instead of taps and buckets. In using this modern method, they avoid having to use formaldehyde tablets. By placing the tube inside the tree, they accomplish the same purpose without the use of chemicals.

It takes about 40 gallons of sap to make one gallon of maple syrup. To turn maple sap into maple syrup, it is gently boiled until it reaches the 66 to 66.5 brix level. Less than

66 brix, and the syrup ferments. More than 66.5 brix, and the syrup crystallizes (like maple sugar). As with any sugar product, the longer you boil it, the darker it becomes.

There are two grades of Maple syrup — A, and B. Grade A, the syrup that is “ready” first is lighter in color and texture, while Grade B is darker. Many people prefer its richer flavor and more molasses like texture. We produce both kinds.

Either way, you’re going to love the taste and appreciate the value.
